

MOBILE eDISCOVERY SOLUTIONS

In today's global economy, the use and flow of data is no longer stifled by geographic borders. However, the ease in acquiring and reviewing electronic data must be balanced by myriad jurisdictional laws and regulations. Often privacy and/or regulatory concerns prevent data from being transferred or reviewed outside its immediate jurisdiction without prior authorization. An innocent miscue in how data is acquired, processed, or reviewed can create a regulatory mountain out of a mole hill.

Mobile eDiscovery Solution (MeDS) is an integrated electronic discovery solution consisting of professional and technological resources designed for immediate deployment anywhere in the world. With MeDS, UHY Advisors' eDiscovery and Digital Forensics Group can establish data acquisition, restoration, processing, and review hosting at virtually any location on a moment's notice.

MeDS consists of two key components: experienced electronic discovery professionals and an industry-leading comprehensive mobile ediscovery kit.

EXPERTISE:

Access to the right electronic discovery tools alone does not ensure implementation of defensible best practices for electronic discovery. Our MeDS professionals have:

- Multi-jurisdictional electronic discovery experience
- The ability to leverage local resources and expertise across a global UHY footprint of over 180 offices
- Success in helping Fortune 500 companies and other multinational organizations with their discovery needs
- Up-to-date relevant certifications
- Digital forensic, legal, law enforcement, and valuation backgrounds and experience
- Project and document review management expertise

INDUSTRY LEADERSHIP:

Our savvy MeDS professionals are able to hit the ground running for any onsite electronic discovery matter with an industry-leading kit of electronic discovery hardware and software tools for data acquisition, processing, and document review. Our kit contains industry recognized tools, such as EnCase, FTK Imager, HardCopy2, LAW 5.0 PreDiscovery, Summation, Concordance, and Clearwell. Its strength lies in our project tested workflow and procedures that integrate these tools to work seamlessly together for successful deployment at an onsite engagement.

SOLUTIONS:

Whether your next electronic discovery matter takes you around the corner or around the world, if you require a rapid mobile electronic discovery solution that allows you to preserve, process, and review data onsite, UHY Advisors' MeDS is a cost-effective, comprehensive solution.

WHY UHY ADVISORS FOR eDISCOVERY

Instead of risking the success of your matter on avoidable procedural missteps, let UHY Advisors' MeDS be your answer.
